140KIT160_AC

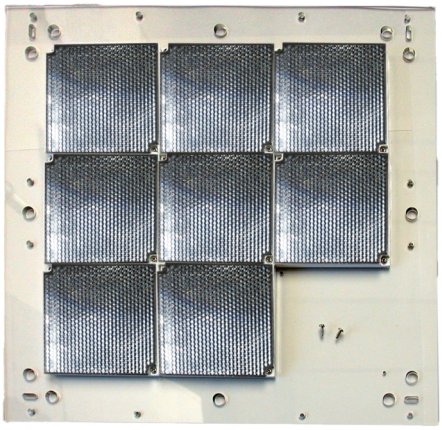

Anti-Condensation range extender for FireBeam XTRA/BLUE 140-160m

140KIT170 anti-condensation Distance Kit / 140-160 Meters

Designed to cover distances between 140 and 160 metres, the Fire Beam 140KIT160 is a clear acrylic plate with 8 extra reflectors attached. Simply add the Single Reflector that is provided with the standard Fire Beam into the spare space on the plate using the screws provided.

For your convenience, the plate is pre-drilled to suit the universally popular Unistrut system. If you need to fit a Fire Beam Head Unit into a position where it is not possible to screw into then you may wish to use our Unistrut Adaptor Plate.

This is the anti-condensation variant of 140KIT160.
